

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) An electron-emitting woven fabric comprising:

first linear bodies having a conductive layer covered with an insulating layer; and

second linear bodies formed of a conductive material and crossing the first linear bodies to form cross parts,

wherein the conductive layer comprises a conductive polymer, a carbonaceous material is provided on a surface of the second linear bodies of the cross parts, the carbonaceous material is one or more selected from a group consisting of carbon nanotubes and fullerenes, and electrons are emitted from the cross parts of the first linear bodies and the second linear bodies.

2-4. (canceled)

5. (currently amended) The electron-emitting woven fabric according to claim [[4]] 1, wherein the fullerenes are added in the conductive polymer.

6. (previously presented) The electron-emitting woven fabric according to claim 1, wherein a diameter of each of the first linear body and the second linear body is not greater than 1 mm.

7. (previously presented) The electron-emitting woven fabric according to claim 6, wherein the diameter of the second linear body is one-half or less than that of the diameter of the first linear body.

8. (previously presented) A display device comprising:  
an electron-emitting woven fabric as defined in claim 1;  
and

a light-emitting portion provided to face an electron-emitting direction of the woven fabric.

9-10. (canceled)
